Subject: DR. WHO 4 Y: UNDERWORLD

To: Graham Williams, Producer, Drama Serials.

I enjoyed this serial. It seems free of many of the problems we discussed the other day. My only reservations concerned episode 1.

P.19. The casual reference to the 'Marie Celeste'. In a previous adventure didn't this carry the Daleks? I would either elaborate on this reference or cut it.

P.42. I hope the 'regeneration' process needn't be painful at all. That screaming could be awful.

P.55. Herricks demonstration of breaking Dr. Who's neck with 'just a little snap' could be very offensive. We needn't show our audience so effectively how to kill each other!

A handwritten signature in dark ink, appearing to read 'Graeme', with a large, sweeping loop at the end.

PROMOTION MATERIAL

'DOCTOR WHO'

'UNDERWORLD'

by

BOB BAKER AND DAVE MARTIN

SELLING POINTS

1. This is the most futuristic adventure "Doctor Who" has ever presented.
2. Once again featuring K9, the Doctor's robot dog, the cast includes top model Imogen Bickford-Smith, James Maxwell and Alan Lake.

STORY:

The Doctor and Leela encounter a group of astronauts from a planet which blew up over 100,000 years ago. Their mission is to find another spacecraft which left just before them but went missing, carrying colonists and the race's gene bank to start a new life in another part of the cosmos.

The craft, with the Doctor, Leela and K9 aboard, plunges out of control into a strange planet on the edge of creation. It looks as though they are all doomed. But the planet is not what it seems.

BRIEF OUTLINE OF PLOT (Information in brackets NOT FOR PUBLICATION)

The Doctor and Leela encounter a group of astronauts from a planet which blew up over 100,000 years ago. Their mission is to find another spacecraft which left just before them but went missing, carrying colonists and the race's gene bank to start a new life in another part of the cosmos.

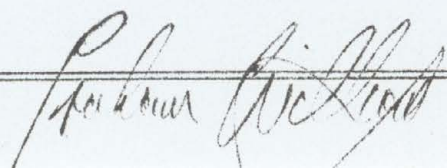

The craft, with the Doctor, Leela and K9 aboard, plunges out of control into a strange planet on the edge of creation. It looks as though they are all doomed. But the planet is not what it seems.

(It is, in fact, a planet which has formed around the missing space ship in the same way that an oyster forms around a piece of grit. The descendants of the original colonists still live inside it, serving the 'Oracle' - the computer which housed and protected the gene bank cylinders, which has grown and developed until it is now master of all around it, ruthlessly controlling all life within the planet.

Over the years, the original purpose of both the ship and the computer has been forgotten, and the arrival of the astronauts and the Doctor sparks off a violent conflict, in which they must battle against the Oracle and its servants before they can win possession of the precious cylinders and the astronauts can blast off again, with their own descendants, to create a new life on their chosen planet.)

DOCTOR WHO OVERRUN : TUESDAY, 4th OCTOBER

H.Serials

c.c. C.A.D.G.Tel.
Org.Serials

I regret that on 4th October we overran studio time by $1\frac{1}{2}$ hours. Having been presented at a very late stage with an enormous design estimate, I decided to take the suggestion from the director and the designer that the material we were seeking to achieve could be realised by the use of models and extensive CSO.

As this was an entirely new way of making television - and the weight of material and realism demanded, as oppose to, for example, the "Chester Mystery Plays", we were obviously optimistic in achieving so much material in the allocated time.

I believe that the actual cash saving will justify the internal costs and inconveniences of the overrun, and that the lessons we have and will learn from this method of production will quite justify the overrun.

Graham Williams

Graham Williams, Producer, Doctor Who

HEAD OF PLANNING (CURRENT) MEMO, 7TH OCTOBER

H.Serials

I regret to say that the circumstances surrounding the "misuse" of this recording machine were brought about solely through the unfortunate experiences we have had in the past when permission to go single ended on a roll back and mix seemed to be in the gift of the engineering shift on duty - the explanation from our TM2 being invariably that such a decision is at the discretion of the engineers if no third machine has been booked. If a third machine has been requested but is not available for some reason, then the Director can reasonably expect to go single ended. I has thus been our policy over the last two recordings on the advice of the TML to book a third machine as an insurance policy. This I am sure would be confirmed by any of the TMs who have worked on this season with the exception of Bob Gell in Birmingham, where the strictures do not appear to apply. With the extensive need to roll back and mix or play-in in this particular programme (the model work and CSO and inlay) there was no reasonable possibility of anticipating when exactly the third machine would be required. Therefore in order to safeguard the time element we took our TM's advice and booked the third machine as a roll back and ~~play~~-in facility for the maximum possible time. We should be delighted not to have to book this third machine - wasted resources are as abhorrent to us as they are to Programme Planning.

DR. WHO OVERRUN : 15th, 17th and 18th OCTOBER 1977

H.Serials

c.c. C.A.D.G.Tel.
Org.Serials

I am afraid that on the evening of October 15th we overran by 5 minutes. We were attempting a vitally important role back and mix and unfortunately at one minute to ten the actress blinked.

We overran on the 17th October by 5 minutes because the entire studio had to be struck and reset that night in order to achieve the CSO/model recording the following day. By overrunning, we therefore avoided the interruption of rehearse-record the following day which would have been necessitated by a day strike and set, and would have left us in an extremely vulnerable position.

We overran by 5 minutes on October 18th in order programme.

It is interesting to note anent my memo of the 13th October, that had the third machine been available to us on the 15th October, a tape change for the role back and mix which took the remarkably short time of 7½ minutes would not have been necessary, and that even taking into account the actress blinking, we should by rule of thumb have come out of the studio 2½ minutes before ten, rather than being forced into a five minute overrun.

DOCTOR WHO RECORDING: 15th - 18th OCTOBER

Chief Engineer

I would like to express my appreciation of the hard work and enthusiasm of everyone concerned with this production. Even by "Doctor Who" standards the technical demands were extreme and I am quite sure that the programme could not have been completed so successfully without such a degree of goodwill as I have mentioned. Whilst I have myself written to as many individuals as possible, I should be grateful if you could convey many thanks to those people who made the programme possible.

Graham Williams

DOCTOR WHO 4Y

Org.Serials

I should like to express my appreciation for the contribution made to this programme by Mike Cager and Sue Mansfield. Whilst I'm sure Norman Stewart will wish to express his appreciation I nevertheless feel that the extraordinary amount of enthusiasm, hard work and efficiency displayed in particular by Mike Cager and followed up by Sue Mansfield should not go unnoted.

Graham Williams

28th October 1977

Dear Shirley,

Thank you once again for all your light fingered work on "Underworld". I look forward to working with you on the six-parter when the extra fingers that we've ordered for you should be ready!

Best wishes,

Graham Williams
Producer, Doctor Who

Shirley Coward,
4023,
TC.

28th October 1977

Dear Peter,

Thank you yet again for the very hard work you and your crew put into "Underworld". Without your contribution I doubt very much we could have finished the programme in so satisfactory a manner. The results, I believe, will be spectacular. Please pass on my thanks to the other members of Crew 10 and let me say once more how much I appreciated your contribution to the programme. See you again soon, I hope.

Best wishes,

Graham Williams
Producer, Doctor Who

Peter Hider,
4024,
TC.

28th October 1977

Dear Chis,

Thank you very much for all your help in making "Underworld" work. Without your double guessing every move we made I don't think we'd have got the show in in so spectacular a fashion as we did. I'll see you I hope at the Gallery only session, but anyway thanks again and I look forward to the opportunity of working with you once more very shortly.

Best wishes,

Graham Williams
Producer, Doctor Who

Mike Chislett,
4032,
TC.

28th October 1977

Dear Richard,

Thank you very much for your patience and hard work on "Underworld". It was, to say the least, a rather unusual programme to work upon, but I am confident that the results will prove very worthwhile. I hope to see you at the Gallery only session and, of course, the sypher dub.

Meanwhile, thanks again and best wishes.

Graham Williams
Producer, Doctor Who

Richard Chubb,
4029,
TC.

28th October 1977

Dear Cecile,

Thank you very much for the work you put into "Underworld" which already looks stunning. We've bought a new action doll for the next season whose face, I hope, will not be quite so delicate as the last one!

I look forward to the chance of working with you again.

Best wishes,

Graham Williams
Producer, Doctor Who

Cecile Hay-Arthur,
E.715,
TC.

28th October 1977

Dear Mike,

Thank you very much indeed for the hard work and hard thinking you put into "Underworld". The results I've seen so far are quite spectacular and I'm sure will create quite a stir when they're shown. I look forward to asking even more of you on the six-parter!

Meanwhile, best wishes,

Graham Williams
Producer, Doctor Who

Mike Jefferies,
4032,
TC.

28th October 1977

Dear Rupert,

Thank you very much for the hard work you put into "Underworld". All your efforts were very much appreciated and I look forward to the chance of working with you again.

Best wishes,

Graham Williams
Producer, Doctor Who

Rupert Jarvis,
3144,
TC.

28th October 1977

Dear Mitch,

Thank you once again for your humbling, fumbling effort in trying to make an impossible script sort of all right! Whilst I know you haven't finished yet, I'm sure you'll improve in time!

Seriously, though, thank you very much for all the hard work you put into a pretty extraordinary show. I think the results will surprise everyone and delight even you. Look forward to the next chance of working with you.

Meanwhile, best wishes,

Graham Williams
Producer, Doctor Who

A.J. Mitchell,
7031
TC.

28th October 1977

Dear Dick,

Thank you very much for the hard work you put into "Underworld". The script made extraordinary demands upon yourself and I appreciate the time, construction and inventiveness you gave to the programme. I look forward to an opportunity of working with you again - perhaps on an easier project such as a remount of "Ben Hur"! Please pass on my thanks as well to Jane.

Best wishes,

Graham Williams
Producer, Doctor Who

Dick Coles,
270
Sc. Blk.
TC.

28th October 1977

Dear Richard,

Thank you very much for the hard work you put into "Underworld". Whilst not being exactly the easiest of programmes I'm sure we can find something more interesting for you to do next time round - like a remake of "Star Wars" two days in the studio and a budget of £50! Look forward to working with you on the miraculous six-parter.

Meanwhile, best wishes,

Graham Williams
Producer, Doctor Who

Richard Conway,

DOCTOR WHO

H.Studio Engineering

I should like to give a very belated appreciation of the work done by Ralph Morton and Bob Newton during ~~our~~ recent studio. Their enthusiasm and ingenuity contributed greatly to the successful completion of the programme. I should be grateful if you would convey my thanks to them, as the likelihood of my seeing them before next season is remote! Thank you.

Graham Williams

- A. THE STORY:** The Tardis stops on the edge of the cosmos and is in danger of being sucked in by a spiral nebula. To escape, the Tardis is materialised on the RLC, an ancient spaceship. Tala, the pilot, collapses and the spaceship lives out of control towards the nebula. The Doctor links K9 up ~~the~~ to the controls which successfully gives RLC enough power to escape. Jackson, the Captain, then instructs his crew to follow a signal which they are receiving. The signal is from another spaceship, the P7E, for which they have been searching for over a hundred thousand years. The course however will take them back into the nebula. The RLC is drawn through a layer of meteorites and becomes encrusted with space debris. The episode ends with the crew trying to blast their way out with the lazer cannon but the cannon appears to have no effect.

A. THE STORY: The crew of the R1C spaceship eventually succeed in blasting their way out of the space debris which has formed a rugby ball shape around the ship, only to find themselves heading, without fuel, into a planet. The planet is giving out a signal which is that from their lost spaceship, the P7E. The R1C crashes into the planet but the exterior proves to be soft and the spaceship sinks below the surface and only hits solid when they reach the core.

Inside the core Idas and his father, Idmon, are trying to free their family buried beneath the rockfall. This is monitored by Rask and Tarn, two security guards. Rask arrests Idmon but Idas manages to escape.

After blasting their way out into the tunnels, Jackson and his crew go in search of the P7E followed by the Doctor and Leela. The Doctor and Leela see Idas being pursued by Rask and his guards. They cause a diversion and Idas finds his way into the R1C. The Doctor and Leela also return to the spaceship after overhearing Rask's order that the tunnels be closed down for fumigation.

Gas starts to come into the R1C airlock. Idas collapses and Leela stays with him while the Doctor goes out into the gas-filled tunnels again. He finds a fan system for the gas and sets to work but the episode ends when he too collapses.

A. THE STORY: The end of Episode Two and hence the beginning of the reprise into this episode leads up to the point where the Doctor collapses over the fan system controlling the gas in the tunnels. The Doctor however succeeds in reversing the effect of the fan and the gas is sucked back into the P7E. Idmon is about to be sacrificed. The Doctor, Leela and Idas set out to rescue him but are captured by Rask and his guards and taken to watch the sacrifice before "they too will answer the question of the sword". A fight breaks out in the Sacrificial Chamber and they escape. Jackson and his crew arrive on the scene again but Herrick is captured and tortured. The Doctor realises that there is another way to get back into the P7E to obtain the race bank cylinders; this is by the goods entrance - the crushers. The Doctor and Leela hide in a skip which is pushed along by Idmon. The episode ends however when Idmon slips and the skip begins its tip into the crushers.

- A. THE STORY:** The skip containing the Doctor and Leela tips into the crusher but they manage to hang on until Jackson and the others come to their rescue and drag them out.
- The captured Herrick tells the seers that the crew is in search of the race bank of the Minyans and Ankh and Lakh decide to give him the cylinders he describes.
- The Doctor, Leela and Idas leave the others and find another way to the Oracle. From a vent they view the collection of the cylinders by Ankh and Lakh. The Doctor discovers that the Oracle however still holds the real cylinders and he manages to obtain them.
- Herrick is brought to Jackson with the false cylinders and they return to the ship. The Doctor and company also return to the RLC but the Doctor discovers that the false cylinders are in fact bombs and takes them back into the tunnels. He meets Rask who takes the cylinders thinking they are still the real ones. The Doctor escapes from the guards and again returns to the ship.
- Ankh and Lakh try to defuse the bombs but the Oracle has made it impossible. The RLC manages to blast out of the planet before it explodes.
- Jackson and his crew have succeeded in their mission and the Doctor, Leela and K9 return to the Tardis.

CONTRIBUTORS:

Doctor Who.....played by.....TOM BAKER
Tala.....IMOGEN BICKFORD-SMITH
Idmon.....JIMMY GARDNER
Tarn.....GODFREY JAMES

Subject: DOCTOR WHO TRANSMISSION : JANUARY 28TH

To: H.Serials

Both Dudley Simpson and Dick Mills have telephoned me to express their concern which I entirely share at the low level of sound on the above transmission. This was noted quite individually by ourselves on each of our own home receivers. As I know you appreciate, "Doctor Who" relies heavily on the audial content of the programme - I wonder if any other producers have experienced similar distortions, and would certainly, in any case, be grateful for any assistance you could give re "Doctor Who".

Graham Williams

No, noone else has
had a similar
problem and the
engineers here
have registered
no complaint.
